

Here is an example of a site navigation tree. Each box shows a single page from your website. There are 13 boxes all together, therefore there would be 13 separate pages within your website.

Below is a flowchart diagram. Your main page to your website is where “Home Page” is written on the top box. In the boxes below write the pages that your website will contain. If this is a redesign of a website, place the pages you currently have on your existing website, then cross out the pages that you would like removed and add any additional pages. (If you have more pages than spaces available, write them below, or write them on a separate sheet of paper). If you’re artistic, you can always make your flowchart diagram on a separate piece of paper.

Total number of pages decided upon ____
